Roadmap

DLTX Crowd Sale

- DLTX crowd sale started at Feb 2018
- DLTX crowd sale performed by IEO — Initial Exchange Offering
- DLTX crowd sale ended at July 2019
- DLTX will be listed on various exchanges.
- DLTX also be listed soon on CoinMarketCap.

IEO — Initial Exchange Offering

- An Initial Exchange Offering, as its name suggests, is conducted on the platform of a cryptocurrency exchange.
- IEO started from 14 cents it lasted for 3 months and ended with 38 cents.
- As the token sale is conducted on the exchange's platform, token issuers have to pay a listing fee along with a percentage of the tokens sold during the IEO. In return, the tokens of the crypto start-ups are sold on the exchange's platforms, and their coins are listed after the IEO is over.
- IEO participants do not send contributions to a smart contract, such as governs an ICO. Instead, they have to create an account on the exchange's platform where the IEO is conducted.

Facts

- DeltaEx Coin will be backed by real BitCoin, Ethereum and USDT (Tether).
- DeltaEx Coin will also be listed on different exchanges where users can sell DLTX on other exchange without any restrictions only for generic buyers.
- DeltaEx Coin can be used for paying exchange fees, listing fees, promotions and bounty programs.
- DeltaEx Coins will be locked for crowd sale users for 4 months from the date of listing where as after 4 months each month users would be able to receive 25% of their holdings each month distributed on daily basis up to balance of their holdings.

DLTX is POS Token

- DLTX is a POS Token where users get mining bonus for holding DLTX in their wallet.
- The Proof-of-Stake mechanism, meaning that every holder can earn some extra tokens just by holding token for a specified (StakeMinAge) period, greater than or equal to The Minimum Coin Age.

POS Mining

- PoS mining is effortless. A user needs only to stake DLTX in a wallet to contribute. In PoS schemes, blocks are 'mined' by having stakes place bets on proposed blocks.
- A PoS miner is limited to mining a percentage of transactions that is reflective of his or her ownership stake. For instance, a miner who owns 3% of the Bitcoin available can theoretically mine only 3% of the blocks.
